(54) FRONT COVER MOUNTING STRUCTURE FOR SADDLE RIDING TYPE VEHICLE

(57)Abstract:

PURPOSE: To minimize the number of jointing tools to improve mounting workability by together-tightening-joining the front side parts of a fuel tank in the body front and the rear side parts of a front cover to body side parts.

CONSTITUTION: Rear side parts 15 and 15 extending from between left and

stepped parts 16 are formed on the lower parts of the side parts 15, and also a fitting hole 17 is provided. On the other hand, brackets 22 and 22 having circular holes are integrally formed on the front parts of left and right joining side parts 21 and 21 hung downward from the outer peripheral plate 18 and the bottom plate 19 of a fuel tank 6. Trapezoid supporting plates 24 and 24 are protrudably provided on an outer side from a left and right pair of upper pipes 11 and 11 joined to a cross pipe 23. Mounting rubbers 27 are fittingly attached to the brackets 22 to be together-tightening-joined to the supporting plates 24 with mounting screws 28 and nuts 26 together with front cover side parts 15. This constitution improves mounting workability.
